7000 SERIES
DISPENSING & VALIDATION SAFES

armor™
SAFE TECHNOLOGIES
Changing the way the world counts cash.

The CacheSYSTEM® 7000 series provides the ultimate level of cash control by limiting cash exposure and providing seamless accounting between the POS and your bank. It offers the combined benefits of cash-counting and bill validation with change-fund management and an audit trail of all transactions.

CacheSYSTEM 7000 safes:

Collect and Secure Cash: Once your cash is placed in an Armor safe, you can rest assured it will stay there. Our products are designed and constructed to rigorous standards to protect each point of access and reduce your risk of robbery.

Count and Validate Funds: Each safe is equipped with casino-quality bill validators that provide the highest level of first-time bill acceptance and unsurpassed counterfeit detection. Counted funds are secured in cassettes for easy transport and deposit. This series may be fitted with up to four validators.

Dispense Change: Our vending magazine is simple to load and count. The inner view provides a visual count of inventory, eliminating reliance on a dipstick.

Audit and Report Activity: Every transaction is recorded and tracked through each user's personal identification number (PIN), providing a seamless audit trail. More than 30 different types of receipts and reports can be printed on the system's high-speed printer, including end-of-day activity, cash removal and individual user reports.

CacheSYSTEM 7000 safes can be configured to:

Control Remote Safes: Additional CacheSYSTEM 1200 remote units may be connected to the 7000 series from a distance of up to 4000 feet. The result provides significant flexibility and scalability. All remote information is reconciled in the main unit.

Communicate: The 7000 series integrates effortlessly with CacheTALK™ III software, allowing the user to access and evaluate transaction data and provide real-time comparisons with POS activity.

CacheSYSTEM 7100

- ☑ Collect and Secure Cash
- ☑ Count and Validate Funds
- ☑ Dispense Change
- ☑ Audit and Report Activity
- ☑ Control Remote Safes
- ☑ Communicate (optional)

The 7100 units are full-featured cash-management tools that may be configured with one or two bill validators. Cash cassettes and change funds are accessed through a single door in the main compartment, which has additional storage space for cassettes, lottery tickets or other valuables.

Specifications
Dimensions: 23¾"W x 20"D x 31"H
Approximate weight: 475 lbs
Power supply: auto ranging for international or domestic use

CS-7100

CacheSYSTEM 7090

- ☑ Collect and Secure Cash
- ☑ Count and Validate Funds
- ☑ Dispense Change
- ☑ Audit and Report Activity
- ☑ Control Remote Safes
- ☑ Communicate (optional)

The 7090 model provides all the benefits of the 7100 model within a smaller, narrower footprint. This allows many users to conveniently upgrade their cash handling process by replacing their legacy change-dispensing safes with a complete cash management solution. The 96-tube vending capacity and the option of one or two bill validators makes the 7090 the smartest safe for customers with limited space.

Specifications
Dimensions: 20⅞"W x 20"D x 31"H
Approximate weight: 425 lbs
Power supply: auto ranging for international or domestic use

CS-7092

CacheSYSTEM 7500

- ☑ Collect and Secure Cash
- ☐ Count and Validate Funds
- ☑ Dispense Change
- ☑ Audit and Report Activity
- ☑ Control Remote Safes
- ☑ Communicate (optional)

The 7500 model is a smart dispensing safe that helps you maintain a complete audit trail for your change fund. In addition, it has a secure drop box for manual deposits and users can log in to record their transaction. If cash counting is required, multiple remote bill validator units may be connected to provide a complete cash-handling solution.

Specifications
Dimensions: 20½"W x 20"D x 31"H
Approximate weight: 440 lbs
Power supply: auto ranging for international or domestic use

CS-7500

CacheSYSTEM 7900

- ☑ Collect and Secure Cash
- ☑ Count and Validate Funds
- ☑ Dispense Change
- ☑ Audit and Report Activity
- ☑ Control Remote Safes
- ☑ Communicate (optional)

The 7900 model provides additional security by securing the bill validator cassettes in a separate, locked compartment from the change funds. This separation reduces the visibility and accessibility of cash, reducing threat of internal and external theft. Access to cash cassettes is controlled by user PIN and high-security key access, which greatly reduces risk and increases safety.

Specifications
Dimensions: 27½"W x 20"D x 31"H
Approximate weight: 540 lbs
Power supply: auto ranging for international or domestic use

CS-7900

CacheSYSTEM 7900W

- ☑ Collect and Secure Cash
- ☑ Count and Validate Funds
- ☑ Dispense Change
- ☑ Audit and Report Activity
- ☑ Control Remote Safes
- ☑ Communicate (optional)

Ideal for cash intensive businesses, the 7900W maintains high levels of cash security in a single safe, while reducing the risk of theft and robbery. This two-door model incorporates up to four bill readers, two of which are locked in a separate compartment that can only be accessed under dual control. There are also additional secure readers in the main compartment.

Specifications
Dimensions: 30¾"W x 20"D x 31"H
Approximate weight: 600 lbs
Power supply: auto ranging for international or domestic use
